

RAITHWAITE SANDESEND

The national distribution of EV chargers is only 5.4% across Yorkshire & The Humber, one of the lowest in the country. This is problematic for EV drivers visiting more remote coastal areas due to the added inconvenience of having to search for their next charging stop.

The Raithwaite Estate is a 73-bedroom luxury 4* hotel, restaurant, and spa on the edge of the North York Moors National Park within walking distance of Sandsend Beach and less than 3 miles from the popular, historic town of Whitby. As one of the only officially accredited carbon neutral UK accommodation businesses, Raithwaite Sandsend is leading the way on sustainability and the installation of EV chargers is a further addition to the Estate's green agenda.

Using a connected supply to the hotel's main car park, EviELife have installed four 7kW chargers, giving staying guests and visitors the opportunity to charge when visiting this stunning, remote North Yorkshire coastline. This was a challenging installation given the distance from the main hotel and the poor data signal in the area. However, working closely with

CHARGER SPECIFICATION

- Charge up to 7kW
- State-of-the-art remote router data connection

Raithwaite's maintenance team, EviELife were able to deliver a state of the art, secure router data connection to ensure the chargers can be managed and monitored through EviELife's advanced portal management software.

Mark Hillyard, Raithwaite's Facilities manager said, "with our help and understanding of the site, EviELife brought the expertise needed to provide EV chargers at Raithwaite. We have wanted to add these for some time and removes any worry that our guests wouldn't be able to visit in their EVs or have to use a three-pin plug via the hotel to charge."
