

Cowley Manor is a 19th Century stately home, lovingly renovated to a luxury hotel and spa. The hotel is set in 55 acres of gardens, lakes and woodlands. As well as staying guests, the hotel welcomes day visitors to its restaurant and spa and hosts a number of weddings throughout the year.

Using the hotel's existing spa electrical connection, EvieLife designed, specified and installed the electrical infrastructure to power the chargers, whilst also providing dynamic load balancing to ensure the existing pool and spa supply was protected.

Kim Turnbull, Cowley Manor's General Manager, said, "As part of a recent complete refurbishment of the hotel, we were required to install EV chargers as part of our planning permission decision and, therefore, having an experienced partner in EvieLife to bring this service to our guests and customers gave the hotel a completely hands-off approach to this project. This was great for us because we could meet planning permission whilst focusing on the other areas of the renovation."

PROJECT SUMMARY

PROJECT DURATION

6 weeks

NUMBER OF CHARGERS

3 x 22kW chargers

CHARGER SPECIFICATION

- Automatic end user payments with QR code straight to Google Pay or Apple Pay, so no need for an app
